DETAILED ACTION

1. Applicant's Preliminary Amendment, received 6 December 2004, is acknowledged.
2. Claims 1-12 are pending and under consideration.

Priority

3. The priority statement at the beginning of the specification must be updated to reflect the current status of all applications.

Specification

4. The disclosure is objected to because of the following informalities:

Page 31, lines 2-3, there are blank spaces, is something to be added?

Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, last line, refers to "the action of (H)". It is unclear what is being referred to because there does not appear to be an "H". Claim 2 depends from claim 1, but does not clarify the issue.

7. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1645

The claims are drawn to an active agent "peptide YY functional analogs". While the specification provides examples of such analogs, the specification does not define the metes and bounds of what actually constitutes a "peptide YY functional analog".

Double Patenting

8. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

9. Claims 1-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,558,708.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the inventions claimed in the instant application are one of the embodiments claimed in the patent.

10. Claims 3 and 6 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 19 of copending Application No. 10/853,824. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are drawn to manipulating satiety in a subject comprising administering peptide YY or a peptide YY functional analog at an amount to alter satiety.

Art Unit: 1645

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

11. No claims are allowed.
